Description

MULTI-PURPOSE ANTI-WRINKLE CREAM WITH SNAIL SLIME, designed to reduce the facial signs of expression, nourishes and hydrates the skin with its **combination of allantoin, elastin, collagen, glycolic acid, vitamins, and essential amino acids, which are all ingredients of the snail slime.**

Nourishing action: About 80% of the skin consists of elastin and collagen fibres. Thanks to the action of the snail slime, the tissues become more elastic and toned.

Regenerating action: The allantoin slows down the process of skin ageing, and simultaneously stimulates the production of elastin and collagen fibres.

Exfoliating action: The glycolic acid performs a delicate peeling of the surface of the skin, and helps with the treatment of skin dyschromia (age spots).

Hydrating action: Thanks to the proteins contained in the snail slime, the tissues are oxygenated and hydrated.

Antioxidant action: Vitamins C and E have the ability to reduce inflammations and fight free radicals.

Apply on a clean face, preferably two times a day, morning and evening. To help with scar tissue or age spots, it is recommended to apply the product three times a day.

Units in box: bottiglia
